SACRAMENTO POLITICIANS ARE COMPROMISING PUBLIC SAFETY

During an emergency Sacramentans can always count on our firefighters. But city politicians are compromising public safety by closing neighborhood fire engines making the fire stations non-operational and ill-prepared to deal with an emergency.

In the past few months these closures have led to the destruction of three homes, injuries to civilians and firefighters and loss of property.

PROTECT OUR NEIGHBORHOODS

It's time for Sacramento neighbors, business, community and religious leaders to join together and keep our neighborhoods safe.

FIREFIGHTERS NEED YOUR SUPPORT

Local firefighters need your support. We're organizing a grassroots public safety effort to keep our neighborhoods safe, and keep all our fire engines open. *Fill out the card today, and pledge your support to keep our fire stations operational.*
